

Cable tv,satellite tv,telephones,cell phones,computers,am radio andfm radio.Oh yes,don't forget smoke signals.

All theses are different forms of getting and sending vital information as well as enjoyment to the multitudes. XMRADIO is no different.

When FM radio came on the scene,AM radio didn't yell FOUL and say it had to go.Of course not.Competition is vital in all businesses.What do you think made this country what it is today? Exploring,discovery and inventing. To even harbor on the thought that XMRADIO doesn't belong here or should be restricted in any way is plain insane.

Who in the hell ever came up with this suggestion in the first place??

That's about as stupid as some of the things that the ACLU comes up with.
